EMBARGOED UNTIL 11.30 A.M. 10 JULY 1992

AWARD RATES OF PAY INDEXES, AUSTRALIA, MAY 1992

STATE LIBRARY OF N.S.W. 20 JUL 1992 1992 GENERAL REFERENCE

#### SUMMARY OF FINDINGS

Annual Movements (May 1991 to May 1992)

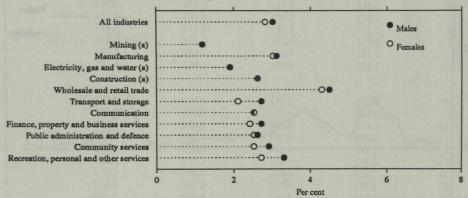

Over the 12 months to May 1992, the weekly award rates of pay index for full-time adult employees rose by 2.9 per cent. For full-time adult males and full-time adult females the indexes rose by 3.0 per cent and 2.8 per cent respectively.

The largest movements over the period for full-time adult males occurred in the Wholesale and retail trade industry (4.5%), and in the Recreation, personal and other services industry (3.3%). For full-time adult

females the largest movements occurred in the Wholesale and retail trade industry (4.3%) and in the Manufacturing industry (3.0%).

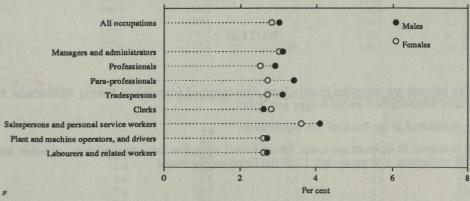

In terms of occupation groups, the largest increases for full-time adult males were for Salespersons and personal service workers (4.1%) and Para-professionals (3.4%). For full-time adult females the largest increases were for Salespersons and personal service workers (3.6%), and Managers and administrators (3.0%).

#### INDUSTRIES, FULL-TIME ADULT EMPLOYEES, PERCENTAGE CHANGE, TWELVE MONTHS TO MAY 1992

(a) Data not available for females in these industries.

#### OCCUPATIONS, FULL-TIME ADULT EMPLOYEES, PERCENTAGE CHANGE, TWELVE MONTHS TO MAY 1992

**INOUIRIES** 

• for further information about statistics in this publication and the availability of related unpublished statistics, contact Bruce McClelland on Canberra (06) 252 6581 or any ABS State office.

• for information about other ABS statistics and services please refer to the back page of this publication.

At the State level, the largest increases in the year to May 1992 for full-time adult males were in the Australian Capital Territory (4.8%) and in the Northern Territory (4.0%). For full-time adult females the largest increases were in South Australia and in the Northern Territory (both 3.4%).

Monthly Movements (April 1992 to May 1992)

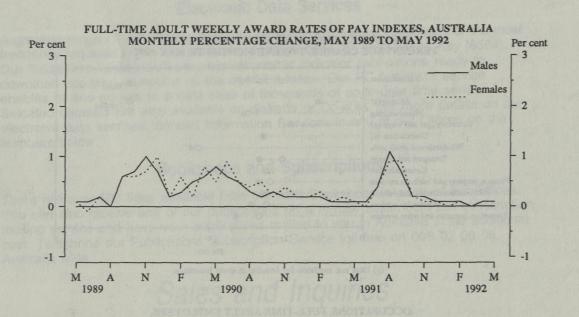

For the period April 1992 to May 1992 the weekly index for full-time adult employees recorded minimal change.

Small increases to male and female indexes did occur for a few industries and occupations. For females the index for the Wholesale and retail trade industry increased by 0.3 per cent. In terms of occupation groups the largest increase occurred for full-time adult female Salespersons and personal service workers (0.2%).

At the State level there were no notable increases.

**Effects of National Wage Cases** 

The following graph of monthly changes in the indexes shows a close alignment between National Wage Case decisions and peaks in the indexes. The increases over the period from September 1989 to June 1990 are due predominantly to the effect of wage increases resulting from the August 1989 National Wage Case. Increases to award rates of pay granted under the April 1991 National Wage Case caused the increases in the indexes in August and September 1991. Wage variations from the August 1989 and April 1991 National Wage Cases are continuing to flow through, although at a slower rate than previously.

#### NOTES

The Award Rates of Pay Indexes are compiled mainly from data obtained from Wage Fixing Authorities, both Federal and State, relating to variations in prescribed award wages and hours.

Explanatory Notes are published at the back of this publication.

Users should note that revisions to indexes are made where award variations are retrospective, or when there is a delay in receipt of notification of variations. See paragraph 17 of the Explanatory Notes.

<sup>(</sup>a) Includes wood, wood products and furniture; non-metallic mineral products; and miscellaneous manufacturing, but does not include all other manufacturing groups.

Note: Statistics covering a more detailed industry classification may be available on request. See paragraph 31 of the Explanatory Notes.

<sup>(</sup>b) Excludes employees in the defence forces; agriculture; services to agriculture; and employees in private households employing staff.

#### **EXPLANATORY NOTES**

#### Introduction

This publication contains indexes for weekly and hourly award rates of pay for full-time adult wage and salary earners. These indexes have been compiled on a monthly basis since the base month of June 1985.

- 2. The methodology used to construct the Award Rates of Pay Indexes is in general similar to that used for other indexes such as the Consumer Price Index and the Producer and Foreign Trade price indexes. It is based on a representative 'basket' of award rates of pay. The indexes are constructed by weighting award rates of pay for selected classifications according to the pattern of employment that existed at May 1985. The 'basket' of classifications, and their weights remain constant during the life of the indexes, so changes in the indexes reflect general trends in award rates of pay over time. They do not measure relative levels of average award rates of pay between States, industries, awards and occupations.
- 3. All award rates of pay series are expressed as index numbers with a reference base of June 1985 = 100.0. The base for the new series of June 1985 was determined using data obtained from the Survey of Employee Earnings and Hours conducted in May 1985.
- 4. The December 1987 issue of this publication contains the first release of these series. That issue provides a large number of series covering the period from June 1985, as well as four appendixes containing:
  - distribution of the weights used to construct the indexes;
  - weighted average minimum standard hours at the base period;
  - weighted average minimum award rates of pay at the base period; and
  - · factors for linking the current and previous series.
- 5. These series replace an earlier series which covered the period June 1976 to November 1987. Note that separate indexes for wage earners and wage and salary earners are not provided in the current series, because of difficulties in distinguishing wage and salary earners in award documentation or in the survey from which employment numbers were obtained. For more information regarding the methodological and conceptual differences between the previous series and the current series, refer to *Information Paper: Award Rates of Pay Indexes* (6343.0) released on 11 February 1988.

#### Scope and coverage

6. The award rates of pay for full-time adult employees, which are normally varied in accordance with awards, determinations or registered collective agreements, have been selected in the indexes. As at June 1985, the indexes cover 3.0 million persons (2.1 million males and 0.9 million females). Approximately 3 per cent of full-time adult employees are covered by unregistered agreements (i.e. those agreements made by an employer with a group of employees and which are not registered with a Federal or State wage fixing authority). For statistical purposes these have been considered to be similar to awards. The rates prescribed in the more

important of these, such as the collective agreement between the State Transport Authority of Victoria and some of its employees, have been included in the indexes.

7. Rates of pay applicable to approximately 16 per cent of full-time adult employees who are not covered by awards, determinations or registered or unregistered collective agreements, are not covered by the indexes. This includes those employees whose rates of pay and conditions of work are not normally varied in accordance with variations in a specific Federal or State award, determination or registered collective agreement or a specific unregistered agreement.

#### Collection of award information

8. Information on award rates of pay for selected classifications is obtained from a variety of sources. The primary updating sources are advices of award variations determined or authorised by industrial tribunals. A number of secondary sources are also used including the Employers' Federation of N.S.W. and the Victorian Employers' Federation. Information obtained by these means is used to update award rates of pay for each selected classification on a monthly basis and used for the compilation of the monthly indexes.

#### Design of the indexes

Selection of the classifications

- 9. The source used to base the indexes is the May 1985 Survey of Employee Earnings and Hours. The Survey collected information on the industry and occupation of individual employees, the award under which they are covered and their award classification.
- 10. This information was used to stratify classifications by industry, occupation and State as part of a sample design which ensured that the indexes have been produced at a satisfactory level of reliability for all cross-classifications included in the series.
- 11. A sample of approximately 700 awards and 5,500 award classifications has been selected for inclusion in the indexes.

#### Compilation

12. Data on the award rates of pay from June 1985 and subsequent months have been compiled for each of the selected award classifications. Estimates of weighted average award rates were calculated by expanding data from the sample of award classifications. The estimates for June 1985 for each component of the series were then converted to an index value of 100.0.

#### Weighting

- 13. The weighting pattern of the indexes is determined at the award classification level. The weights applied to the award classifications included in the indexes are derived from the May 1985 Survey of Employee Earnings and Hours. The distribution of the weights used in the construction of the indexes is shown in Appendix A of the December 1987 issue of this publication.
- 14. Awards have been divided into two groups, 'major' awards and 'minor' awards, depending on the estimated employment coverage of each award. All 200 major awards have been included in the indexes, while only a

sample of approximately 500 minor awards have been included. For classifications selected within major awards, the employment benchmarks have been inflated in the indexes to account for the total employment within the award. For classifications selected within minor awards, employment benchmarks have been inflated in the indexes to account for the total employment coverage of all minor awards.

#### Limitations of weighting

15. The indexes are fixed weight indexes. The weights of the indexes need to be reviewed periodically because of the problems inherent with having fixed weight indexes. In particular, the indexes are not responsive to changes in the structure and coverage of awards, and are likely to become less representative and therefore less reliable over time. An example of this type of problem occurred with the Victorian Nurses Award. This award underwent a major restructuring during 1986 with some classifications being amalgamated and others being split into two or more classifications. This type of restructuring of an award in the indexes means that an equivalent classification needs to be selected from the revised award structure. However, until a complete review of the indexes is carried out, the old weighting structure must be used.

16. Another example of the problems that can occur with fixed weight indexes concerns second-tier variations (March 1987 National Wage Case decision). In general, second-tier variations have been applied to all employees covered by an award. In some cases however, the second-tier increase has only been granted to a proportion of the employees covered by the award. Because of the fixed weights of the indexes a partial increase to the award cannot be included in the indexes. In such cases the indexes are varied if the increase applies to the majority of the employees covered by the award.

#### Revision of the indexes

17. In some cases, when awards etc. are varied, the new award rates are made retrospective. In addition there is sometimes a considerable delay in the receipt of notification of changes in award rates in respect of the classification included in the indexes. Because of these factors the figures in this publication are subject to revision. Revisions for States, industries and occupations are included in this publication. Revised figures for each industry and occupation group in each State are available on request.

#### **Definitions**

18. The award rates of pay used in the compilation of the indexes:

#### Include

- the base rate and any allowances or loadings that are applicable to ALL employees under a specific award classification (e.g. industry allowance); and
- (ii) supplementary payments when they are specified within the award.

#### Exclude

(i) remunerative allowances. It is considered that these allowances are paid to reimburse employees for expenses they are expected to incur during the course of their employment (e.g. tool allowances). The inclusion of these allowances would not

- reflect the true level of remuneration of these employees; and
- (ii) superannuation payments and other payments such as severance and termination payments which are paid to employees as part of an award agreement.
- 19. The weekly award rates of pay series for full-time adult employees provide details of the movements in the weekly rates of pay for award classifications included in the index.
- 20. The hourly award rates of pay series for full-time adult employees provide details of the movements in the hourly rates of pay for award classifications included in the index. These series include only those awards and classifications where hours of work are specified in the award
- 21. Estimates of standard weekly hours of work previously included as an appendix to the June and December issues of this publication can now be obtained on request via a special data service. Inquiries should be made to Bruce McClelland on (06) 252 6581. These estimates apply to all wage and salary earners where standard hours are specified in the award etc. They refer to weighted average standard weekly hours of work where the weighting is based on the weights used for the construction of the award rates of pay indexes.
- 22. Estimates of the weighted average minimum weekly award rates of pay are based on the weights used in the construction of the award rates of pay indexes. The weighted average minimum award rates of pay at the base period are included as Appendix C of the December 1987 issue of this publication.

#### Reliability of indexes

23. Since the indexes are based on information obtained from a sample of employers they are subject to sampling variability. That is, they may differ by chance from figures that would have been produced if all employers had been included in the survey.

because occur 24. Inaccuracies may also imperfections by respondents or in processing by the ABS. Inaccuracies of this kind are referred to as non-sampling errors. Although considerable care is taken in questionnaire design; in the instructions given to employers on how to select a sample of their employees; in editing the survey returns; and in relating the figures to comparable statistics, these inaccuracies may occur in any enumeration, whether it be a full count or a sample. As an example, non-sampling error may occur in the survey where employers are uncertain of the precise awards and classifications which cover their employees.

#### Comparability of results

25. When comparisons are made between period-to-period movements in the Award Rates of Pay Indexes (ARPI) and movements in Average Weekly Ordinary Time Earnings (AWOTE) for full-time adults published in Average Weekly Earnings, States and Australia (6302.0) it is important to recognise the different coverage, scope, definitions and methodology used in the construction of each series. In particular, the AWOTE series includes a number of payments additional to award rates of pay used in compiling ARPI. Allowances covered

under awards which are not industry or occupation-wide in their application such as site, travelling, height or dirt allowances, are excluded from ARPI but included in AWOTE. The AWOTE series also includes other payments such as shift penalty payments and over-award pay. A significant number of employees are not covered by awards but are included in AWOTE. The AWOTE series is also affected by compositional changes in the labour force. However ARPI is not similarly affected, fixed-weight indexes constructed from a representative 'basket' of occupations selected from the May 1985 Survey of Employee Earnings and Hours. It is subject to reselection and rebasing at infrequent intervals. Other factors affecting comparisons between the two series include seasonal influences on earnings and differences between the two series in the treatment of retrospective pay increases. A detailed description of the methodology, scope, and definitions used in compiling AWOTE is featured in Catalogue No. 6302.0.

Classification of industry and occupation

26. Industry is classified according to the Australian Standard Industrial Classification (ASIC), 1983 (1201.0). Occupation is classified according to the Australian Standard Classification of Occupations (ASCO) (1222.0).

General increases in award wages

27. Details of general increases in award wages as a result of wage hearings since 1980 are included as an appendix to those issues of this publication which correspond to the month in which general wage increases have been awarded. Information for earlier periods was published in *Labour Statistics*, *Australia*, 1980 (6101.0) and earlier issues of that publication.

Related publications

28. For details of previously published indexes reference should be made to previous issues of this publication and the following publications:

30. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue of Publications and the Publications Advice are available from any ABS office.

Unpublished statistics

31. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, computer printout, clerically-extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries for unpublished statistics related to this publication should be made to Bruce McClelland on (06) 252 6581, or to Information Services in the nearest ABS office.

### Symbols and other usages ... not applicable

32. As the indexes are rounded to one decimal place, discrepancies may occur between the published annual percentage changes in Tables 1, 4, 5 and 6 and the value which would be produced by calculating the percentage change from the published statistics.

Forthcoming issues

33. The following table shows the dates on which the *Award Rates of Pay Indexes*, *Australia* (6312.0) publication is expected to be released.

	Issue	Expected Release Date			
1992 June		14 August 1992			
	July	11 September 1992			
	August	9 October 1992			
	September	13 November 1992			

### For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

#### Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

#### **Electronic Data Services**

A growing range of our data is available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key \*656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

#### **Bookshops and Subscriptions**
